- Quality in all aspects of our operations, from manufacturing to customer service
- Enhancing and strengthening our relationship with our customers and striving to target new customers
- Entering into strategic companies and building strong relationships with distinguished partners in all construction and contracting activities

EXPANSION JOINT PROFILE

ALUMINIUM AND TPE

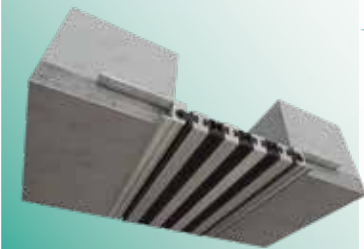

FR172-050

Technical Specifications

Surface Mounted Expansion Joint Profile is suitable for granite, ceramic, vinyl, industrial floor with screw holes.

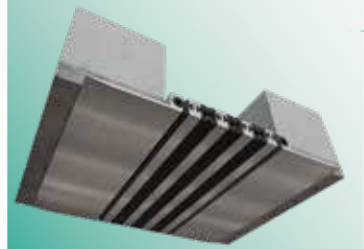

FR211-100

Technical Specifications

Flush Mounted Expansion Joint Wall & Ceiling Profile suitable for Plaster and Dr wall. Compatible with AR303-100

FR259-100

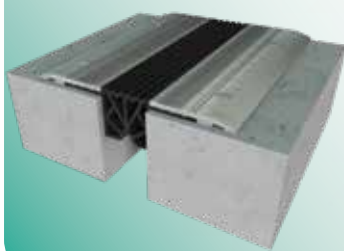

Technical Specifications

Surface Mounted Expansion Joint Wall & Ceiling Profile with screw holes. Assembled Delivery

EXPANSION JOINT PROFILE

CARPARK EXPANISON JOINT

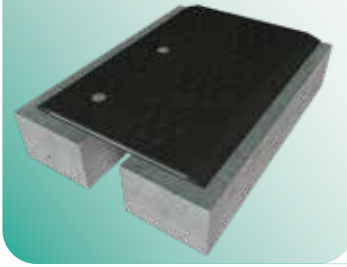

FR192 050

Technical Specifications

Surface Mounted Expansion Joint Profiles suitable for Parking Lots and resistant to heavy load with two sided screw holes.

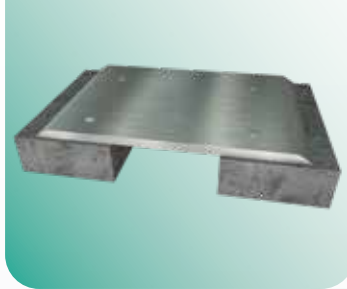

FR951-050

Technical Specifications

ST37 grade steel and rubber composite Surface Mounted Floor Expansion Joint Profile suitable for Parking Lots.

FR951-150

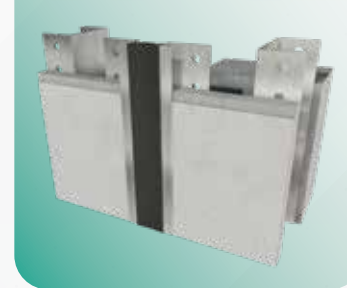

Technical Specifications

ST37 grade steel and rubber composite Surface Mounted Floor Expansion Joint Profile suitable for Parking Lots.

EXPANSION JOINT PROFILE

GASKETED FLOOR, WALL CEILING

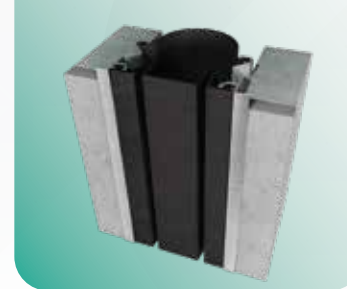

FR220-031

Technical Specifications

Flush Mounted Wall&Ceiling Expansion Joint Profile suitable for Suspended Ceiling and dr wall with smooth insert.

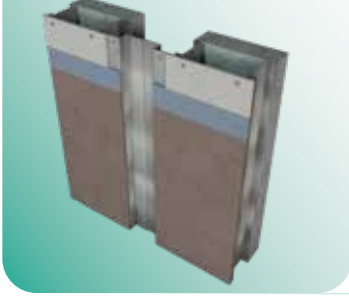

FR285-100

Technical Specifications

Flush Mounted Expansion Joint Wall & Ceiling Profile

FR287-100

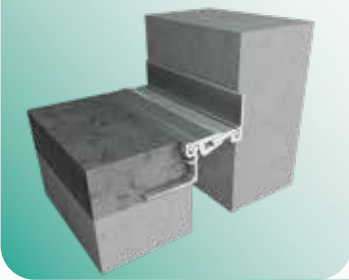

Technical Specifications

Expansion Joint Profile Suitable for Dr wall applications.

EXPANSION JOINT PROFILE

HEAVY DUTY EXPANSION JOINT

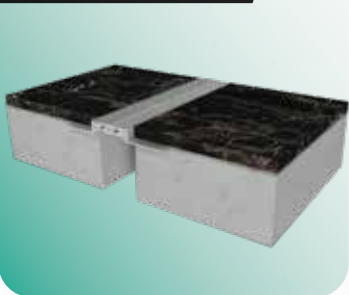

FR703-050K

Technical Specifications

Flush Mounted Expansion Joint Profile suitable for Industrial Structures because of the resistance to forklift load, and also it has flat top surface and this flat surface makes it compatible to hygienic areas such as hospitals and shopping malls. It's EPDM gasket allows sound-proof.

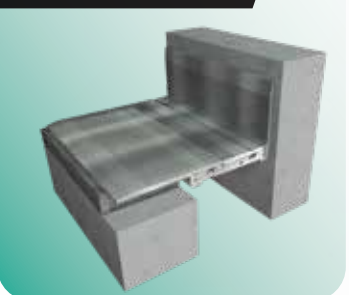

FR820-050

Technical Specifications

Flush Mounted Expansion Joint Profile suitable for Shopping Malls, Hospitals, with flat top surface

FR883-100K

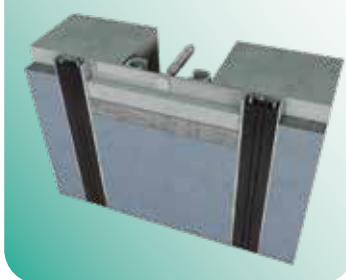

Technical Specifications

Surface Mounted Expansion Joint Floor Profile which has Flat top surface with screw holes. Assembled Delivery.

EXPANSION JOINT PROFILE

SEISMIC EXPANSION JOINT

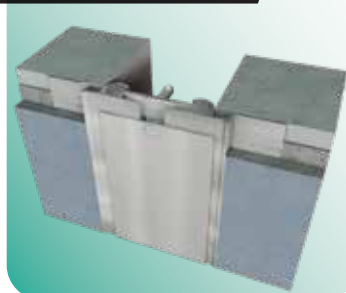

FR232-100

Technical Specifications

Surface Mounted Seismic Expansion Joint Wall & Ceiling Profile compatible with AR802 series and suitable for Ceramic, Plaster and Dr wall.

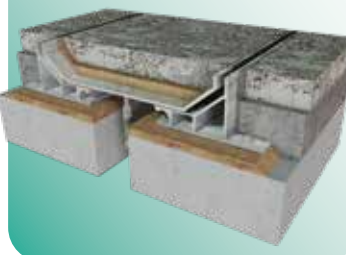

FR243-100

Technical Specifications

Surface Mounted Seismic Expansion Joint Wall & Ceiling Profile compatible with AR813 series and suitable for Ceramic, Plaster and Dr wall. It has Stainless Steel Cover Surface.

FR804-100

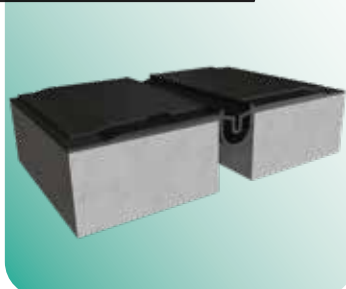

Technical Specifications

Decorative, Sealant Applied, Flush Mounted Seismic Expansion Joint Floor Profile for 10cm gap with stainless steel top caps.

EXPANSION JOINT PROFILE

WATERTIGHT EXPANSION JOINT

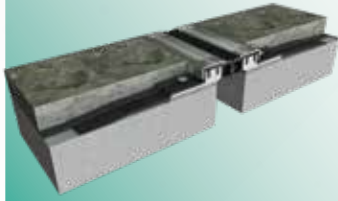

FR500- 030

Technical Specifications

Thermoplastic dilatation tape that is suitable for bituminous membrane used for isolation purposes in the dilatation gap.

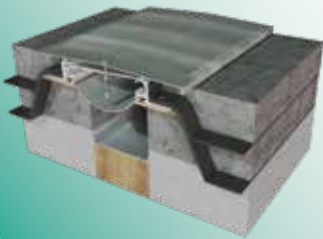

FR600-050A

Technical Specifications

Expansion Joint profile Compatible with rubber based bituminous membrane which provides waterproofing and suitable for Waterproofing required areas such as terrace, parking lots.

FR605-100

Technical Specifications

These are parapet type terrace expansion joint profiles applied for protection of dilatation insulation in the application of outdoor terrace roof. Applied with heel concrete or bitumen embured. To make it waterproof, thermoplastic H profiles should be used at the joints.

COVER EXPANSION JOINT PROFILE

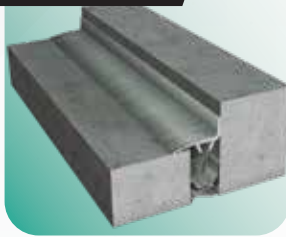

LGF250-100

LG250-100

LGF250-70

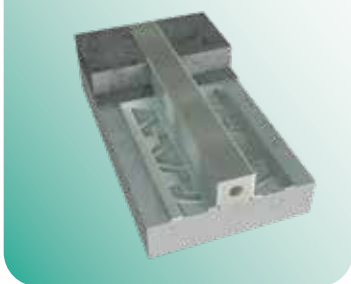

LG250-70

CONTROL JOINT PROFILE

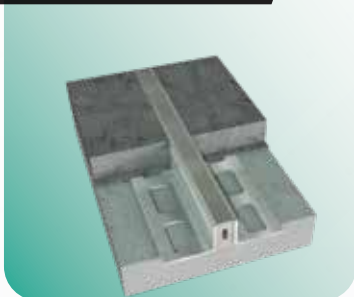

DP13-14

Technical Specifications

Stainless steel movement joints profiles of FADRAS DPseries offer functional solutions for all industrial flooring. Made from aluminum and middle part of profile is TPV rubber.

DP08-12

Technical Specifications

The flooring tiles would be deformed due to thermal expansion and various reasons.

HANDRAIL SYSTEM FOR HOSPITALS

DP13-14

Technical Specifications

AHL.40 light handrail in Life-blend® material with aluminium profile, handle-grip 40 mm diameter, with aluminium wall brackets, complete of adjustable joints for stairs, non-toxic, antibacterial with a strong grip even on double sheet dr wall.

BH.140

Technical Specifications

Bumpers handrail BH.140 in Life-blend® material with aluminium profile, non toxic, antibacterial, elastic shock-absorbing, height 140 mm.

BH.170

Technical Specifications

Bumpers handrail BH.170 in Life-blend® material with aluminium profile, non toxic, antibacterial, elastic shock-absorbing, height 170 mm.

RUBBER GUARD

Rubber Wheel Stopper

Technical Specifications

KGARDS are specially built kerb stoppers or wheel stoppers. KGARDS are designed to cover the complete width of individual car parks. KGARDS are also laid as two pieces of shorter lengths. However, the length of each unit shall be as per customer requirements. Counter-sunk holes shall be drilled on the top

Rubber Corner Guard

Technical Specifications

COLGARDS are extruded profiles manufactured from high impact-resistant rubber, designed to protect the corners of columns. COLGARDS are specially formulated to resist harsh weather conditions. The special blend of formulation also helps COLGARD to withstand damages caused by collisions as well as abrasions.

Rubber Speed Hump

Technical Specifications

SPEED HUMP comprises of individual units length as per table below, arranged alternatively in black and yellow colors. Two end pieces are provided for each length of Speed Breakers, except for extruded design. Reflective eyes are provided on both traffic approach sides, red and green respectively, except for extruded design.
